

Kwara is looking for a talented student like you! We want you to join us in Kenya, help us grow our startup and expand to new markets. You will be part of a global and energetic team in Nairobi, learn from our fast-growing fintech practices and become a catalyst for our success!

About the company

Kwara is a B2B fintech startup in Nairobi and Berlin with a unique mission, exceptional team and global impact potential. Our mission is to digitize Savings and Credit Unions in emerging markets that serve the 3 billion un- and underbanked population. These financial institutions hold a staggering \$2.6 trillion in assets worldwide, but have yet to benefit from digital innovation. Our intuitive, secure and SaaS-based digital banking platform offers them the chance to grow their profits, connect to the digital ecosystem and serve their members better. With a dozen happy clients in Kenya, an ambitious team and a burning desire to grow at least tenfold in 2020, we are well on our way to become a market leader in Kenya and ASEAN. Are you with us for this ride?

About the responsibilities

As a Data Analyst, you will together with our CEO and Head of Operations be responsible for:

1. Measuring the operational and financial impact we have on financial institutions we serve
2. Analyzing user behavior and aligning with the product team to optimize our product
3. Strategizing on what data Kwara can retrieve short -, mid- and long-term and to which parties this would be of value
4. Acquiring data from primary and secondary sources, process it for onboarding and maintain databases
5. Work together with management to prioritize and extract the right information for business needs and decision-making
6. Structuring and optimizing our data import and onboarding process
7. Reviewing and contributing to our machine learning strategy and ongoing white papers

About the requirements

Our team is looking for highly motivated students with the following qualifications:

- Strong analytical skills to collect, organize, analyze, and disseminate large amounts of data
- Can understand business goals and identify what information is needed to measure those goals effectively
- Technical capability to build data models, database design, segmentation techniques and statistical analysis
- Can identify trends and patterns in a complex data set
- Ability to filter and clean data on templates such as Excel
- Can import large amount of financial data and teach others how to organize said data
- Eye for detail and high level of accuracy in work and reporting

About the reward

Data Analyst - Nairobi, Kenya - 6 months starting April/May '20

Fintech Internship in partnership with Catalyst Fund

Kwara offers a unique working environment. We are a team of odd, different, yet surprisingly aligned team members who strive for the very best of themselves. Our team thrives on big wins and will work relentlessly to achieve them. We offer you this challenge with our deeply entrepreneurial culture, where everyone has equal input and can offer new ideas and solutions. We expect you to be part of a ride you will never forget, with our team, our partners and our clients in this beautiful country called Kenya!
