

ATLAS OF GLOBAL INSURANCE EXPOSURE

A visual distribution of \$540 trillion insured exposure worldwide

Non-Life | Life

The Atlas displays the global exposure for the main classes of business highlighted within the Data Definitions Document.* The size of square is proportional to the total insured value.

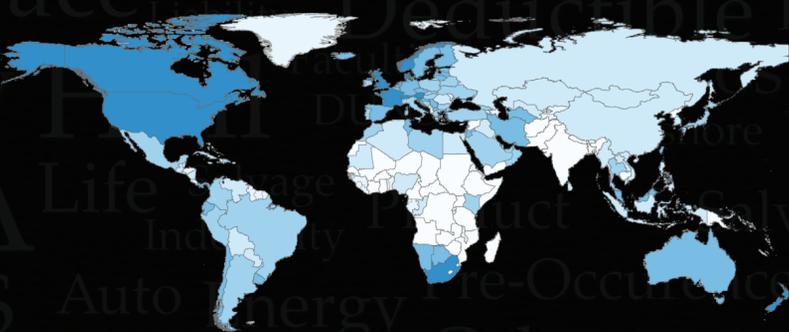

Some insurance types are shown independently from their classes of business.

Exposure Types

COMMERCIAL PROPERTY TOTAL EXPOSURE

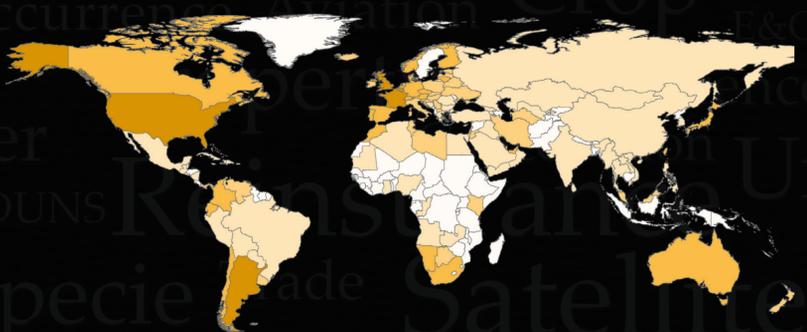

Insured value relative to GDP

High Low

CASUALTY LIABILITY TOTAL EXPOSURE

Insured value relative to GDP

High Low

Three clash scenarios have been developed to complement the data definitions document, and to further explore exposure to clash scenarios. (Loss depicted not to scale).
