2026 Cambridge Risk Symposium

18 June 2026

Energy resilience

Is the UK energy system resilient?
How is the system developing

Is the UK energy sector resilient?

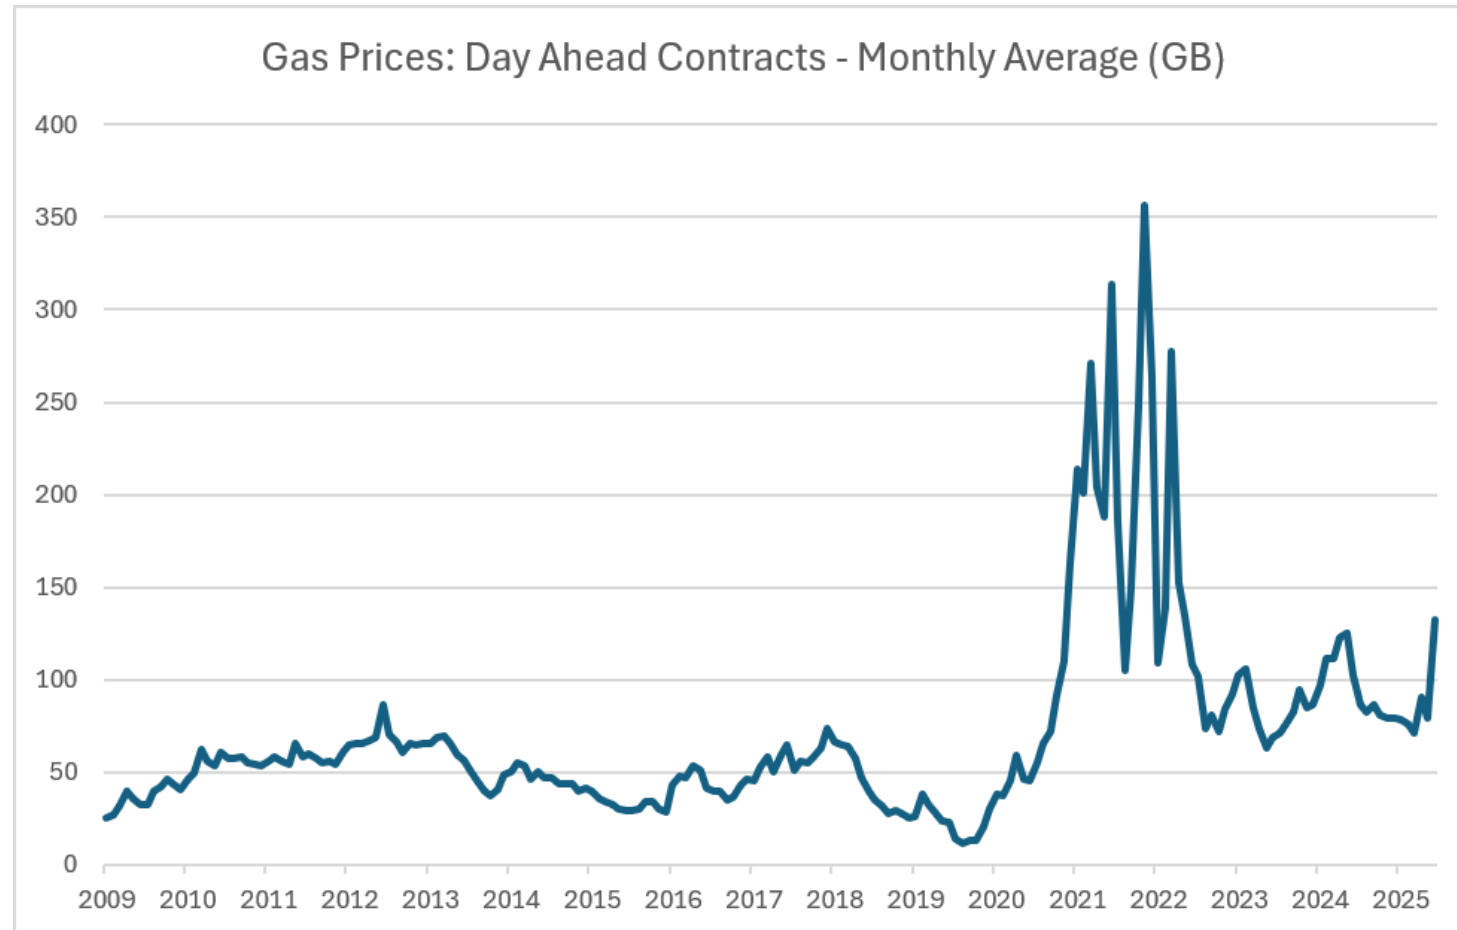

Affordability

Economic

Climate change

Aging assets

Affordability

Economic

- Over 28 suppliers could not manage price uncertainty during price shocks in 2021/2022, leading to collapse
- ~2.5 million customers impacted
- Estimated £2.7bn cost to UK consumers

Climate change is testing the system

Aging assets are a growing threat

How we succeed?

Customer centric view on resilience.

Enhanced collaboration between developers, stakeholders, and customers.

System based solutions tackling full energy lifecycle.

Panel discussion session
